### **DETAILED ACTION**

1. Claims 1-29 are presented for examination. Claims 1-9 are canceled. Claims 10-29 are pending in the application.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The current title is imprecise.

### ***Specification***

3. The disclosure is object to because of the following informalities:  
the specification must identify any related application/patens by the serial number (not by the Attorney's Docket number and any other number) or patent number, if patented. Please make sure that the related information is up to date.

In page 8, line 10, "interfacial" should be – interface --.

Appropriate correction is required.

### ***Claim Rejections - 35 U.S.C. § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 10-19 and 28-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 recites the limitation "the state" in line 2. There is insufficient antecedent basis for the limitation in the claim.

Art Unit: 2115

Claims 11-19 are rejected because they incorporate the deficiencies of claim 10.

Claim 28 recites the limitations "the application" in line 1; "the state" in line

5. There are insufficient antecedent basis for the limitations in the claim.

Claim 29 is rejected because they incorporate the deficiencies of claim 28.

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claim 10, a bias generation circuit for generating a plurality of gate control signals from the first signal and the second signal as set forth in claim 10, but only a bias generation circuit for generating a plurality of gate control signals from a third signal which is outputted from a comparison circuit, see figure 4.

### ***Claim Rejections - 35 U.S.C. § 101***

#### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164

Art Unit: 2115

USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 10-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,671,816. Although the conflicting claims are not identical, they are not patentably distinct from each other because the U.S. Patent 6,671,816 and the instant application are claiming common subject matter, as follows:

The subject matter recited in claim 10 of instant application – “comprising: a sequencer for applying power to a circuit including a comparison circuit, a bias generation circuit and a back gate bias application circuit”- are fully disclosed in claim 10 of U.S. Patent 6,671,816.

The subject matter recited in claim 20 of instant application – “comprising: a circuit for applying power to an integrated circuit including a back gate, a controller circuit and a back gate bias application circuit”- are fully disclosed in claim 1 of U.S. Patent 6,671,816.
